This review verifies the reproducibility of the exhibits included in the paper "*Firm's Preferences for Emissions Reducing Measures and Willingness to Pay for Carbon Tax in Vietnam*".

Contents in this review:

1. Main findings
2. List of exhibits and reproducibility status
3. Reproduction Environment

Main findings

- **Every exhibit of the paper has been reproduced accurately.**
- The code was successfully executed on a new computer after:
 1. Creating the working directory on line 3.
 2. Creating global relative paths.
- The output demonstrates consistent stability across multiple runs. Specifically, executing the code two times consecutively yielded identical results.
- The code takes approximately 1 minute to run.
- We conducted our reproducibility analysis based on the paper shared by the authors.
- **Verification Process and Data Handling:**
 - The reproducibility package relies on 1 type of data: limited-access data.
 - Reviewers used limited-access data provided directly by the authors to conduct the reproducibility verification, and this is not included in the public reproducibility package.
 - *data_hash_report.csv* lists the SHA256 hashes of all files in the Data folder to support data integrity checks. Users who acquire the forthcoming/accessible/limited-access/restricted data can use this file to verify that the data has not been altered.
- **Reproducibility Summary:**
 - **Data:** All data is limited-access and has not been included in the reproducibility package. For more details, refer to the README file.

- **Code:** All code files (from cleaning to analysis) are included in the reproducibility package.
- **Outputs:** All outputs are generated by code included in the reproducibility package.
- **Dependencies environment:** The reviewers created a new environment using the latest versions of dependencies available at the moment of the review.

List of exhibits and reproducibility status

Results in the Main Section of the Paper

- **Figure 1** Reproduced. Table includes manual changes from code output
- **Figure 2** Reproduced. Table includes manual changes from code output
- **Figure 3** Reproduced. Table includes manual changes from code output
- **Figure 4** Reproduced. Table includes manual changes from code output
- **Figure 5** Reproduced. Table includes manual changes from code output
- **Figure 6** Reproduced. Table includes manual changes from code output
- **Figure 7** Reproduced. Table includes manual changes from code output
- **Figure 8** Reproduced. Table includes manual changes from code output

Results in the Annex

- **Table 1.A** Reproduced.
- **Table 1.B** Reproduced.
- **Table 1.C** Reproduced.
- **Table 1.D** Reproduced.
- **Table 1.E** Reproduced.
- **Table 1.F** Reproduced.
- **Table 1.G** Reproduced.
- **Table 1.H** Reproduced.
- **Table 2** Reproduced.
- **Table 3** Does not apply. Non-analytical output
- **Table 4** Reproduced.
- **Table 5** Reproduced.
- **Table B1** Reproduced.

Reproduction Environment

Paper exhibits were reproduced on a computer with the following specifications:

- OS: Windows 11 Enterprise
- Processor: Intel(R) Xeon(R) Gold 6226R CPU @ 2.90GHz (2.90 GHz) (2 processors)
- Memory available: 16.0 GB
- Software version: Stata 19.0 MP
