

RD Plots – Wave 1 (2020) and Wave 2 (2021), Part 3

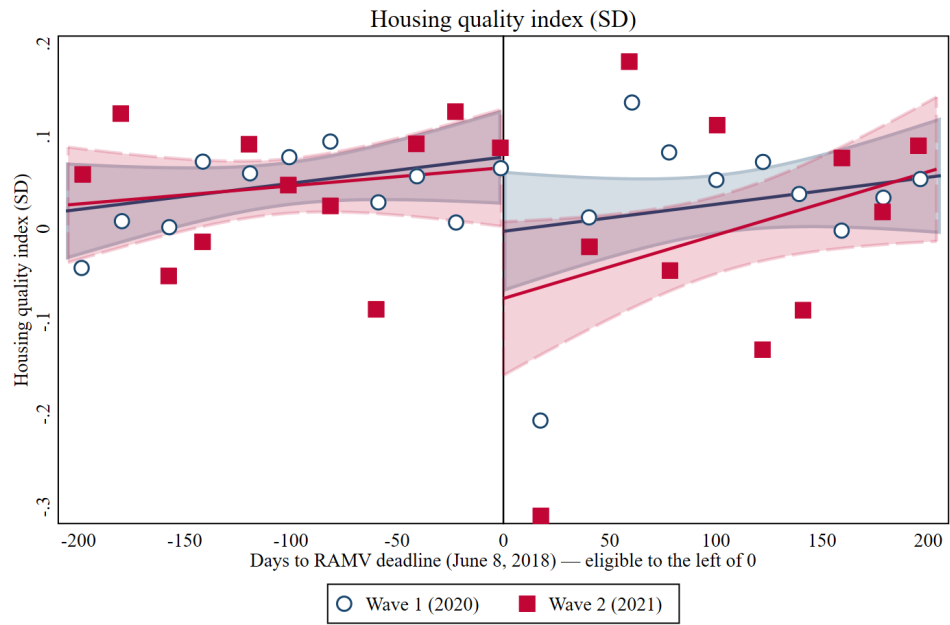

Notes: Each panel plots a headline outcome against days to the RAMV deadline (June 8, 2018). Eligible households arrived strictly before the deadline (left of zero). Hollow circles are Wave-1 (short-run) bin means; filled squares are Wave-2 (medium-run) bin means; bins are 20 days wide. Lines are linear fits on each side of the cutoff with 95% CI bands. Standardized indices labeled '(SD)'; binary indicators labeled '[=1]'.
 Food security index (SD)

Notes: Markers are mean outcome by 20-day bins of arrival date; lines are linear fits on each side of the RAMV cutoff with 95% CI bands. Sample restricted to JEEA-style analysis sample ($|\text{days}| \leq 206$). Eligible households are those who arrived strictly before the deadline (left of 0).
