This review verifies the exhibits' reproducibility in the paper "*Trade, Outsourcing, and the Environment*".

Contents in this review:

1. Main findings
2. Reproducibility assessment
3. List of exhibits and reproducibility status

Main findings

- The code was successfully executed on a new computer after:
 1. Changing the file paths in the main do file.
 2. Verifying the installation of the needed packages.
- The output appears to be stable across multiple runs. There are variations in the .xlsx and .dta files, which are expected due to the inclusion of timestamps.
- The full code takes approximately 20 minutes to run.
- Every exhibit has been reproduced accurately by the provided package. This reproducibility analysis was conducted only for the exhibits in the Main section of the paper and not for the Appendix.

Reproducibility assessment

- Paper exhibits were attempted to be reproduced a computer with the following specifications:
 - OS: Windows 11 Enterprise
 - Processor: Intel(R) Core(TM) i5-1145G7 CPU @ 2.60GHz
 - Memory available: 11.7 GB
 - Software version: Stata version 18
- Our reproducibility analysis was conducted based on the paper present in the reproducibility package. The validation process involved comparing the code-generated results with the paper's exhibits to assess consistency.

List of exhibits and reproducibility status
