

Instructions for Replicators

Overview

This readme provides instructions on replicating the results in the draft working paper: *Are Unit Values Reliable Proxies for Prices? Implications of Better Price Data for Household Consumption Measurement in a Low-Income Context* by Omoniyi Alimi, Wilbert Drazi Vundru, and Talip Kilic. The provided code reproduces all tables and figures in the paper including the appendix tables:

Data Availability and Folder Structure

The data used for the analysis is provided with the replication package in the Input folders. There are two folders in the replication package. One named Unit Value, and another named Market Price. The Market Price folder contains the do-files in the folder named 0_Do. All input files are either in the Input files in the Market Price folder or in the Unit Value folder. All folders are required for replication thus folder structure should be maintained.

The raw data are various modules of the Malawi Fifth Integrated Household Survey 2019-2020 except the agriculture components (files starting with ag_). This data is publicly available and can be accessed at <https://microdata.worldbank.org/index.php/catalog/3818/data-dictionary> after free registration at the World Bank Micro Data library. Please note that the naming convention for the market survey data in our analysis is MOD_* versus mrk_mod_* in the publicly available data. There are several modules that make up the household survey data, the description of each module of the Integrated Household Survey are available in the link above.

Software requirements

Stata (code was last run with version 18)

Memory and Runtime Requirements

This code was ran on an Intel® Core™ i5-6200U CPU with 8GB RAM, 250GB of local storage. Runtime: 2.5hours

Description of programs/code

Prog name	Description
0_OA_Master_ihs5_rep	Master do-file that executes all the do-files below
1_OA_MP_marketsurvey_rep	Cleaning of market survey data
2_OA_MP_food_rep	Creating of food consumption aggregates
3_OA_MP_price_deflators_rep	Creating of price deflators
3a_OA_MP_price_deflators_limited	Creating of price deflators for limited items
3b_OA_MP_price_deflators_one_to_one	Creating of price deflators for mapped one to one between market survey and IHS5 food module
3c_OA_MP_pricedeflator_reg_rep	Price deflators regressions
4_OA_MP_tconsumption_rep	Creating of total consumption aggregates
5_OA_MP_povline_rep	Deriving poverty lines
5a_OA_MP_povline_ref group mod_rep.do	Deriving poverty lines with variations in reference group
5b_OA_MP_povline_1911_calorie_rep.do	Deriving poverty lines with variations in calorie requirement
6_OA_MP_prate_rep.do	Calculating poverty headcounts

6a_OA_MP_prate_night_lights_rep.do	Relationship between poverty estimates and nightlights at district level
6b_OA_MP_prate_night_lights_rep.do	Relationship between poverty estimates and nightlights at TA and EA level
7_OA_MP_Alchain_Allan_final_rep	Test of Alchain Allan effect
R1_OA_marketsurvey_rep	Cleaning of market survey data for reduced market survey assumption
R2_OA_food_rep	Creating of food consumption aggregates for reduced market survey assumption
R3_OA_price_deflators_rep	Creating of price deflators for reduced market survey assumption
R4_OA_tconsumption_rep	Creating of total consumption aggregates for reduced market survey assumption
R5_OA_povline_rep	Deriving poverty lines for reduced market survey assumption
R6_OA_prate_rep.do	Calculating poverty headcounts for reduced market survey assumption
R7_OA_markets_Summary_rep	Summary of Market visits under each level of market coverage
X6_Comp_povrate_rep	Comparison of poverty rates under full and reduced spatial market coverage

Instructions to Replicators

Replicators should run the master do-file (0_OA_Master_ihs5_rep) to execute all do-files. Edit the master do-file to adjust the default path then run all. Run lines 25 to 44 to make the for the analysis and run this part only once. The rest of the do-file can be run after the directories have been created. Change the directory on line 27 to replicators computer and run

Each do-file can be run separately if required but they need to be run in sequence as by their numbering (run 1,2,3,3a ...etc.) and order in the master do-file. All user-written commands needed can be installed from SSC or installed by uncommenting the section *user written commands* in the master do-file. All outputs (Tables or Figures) are saved in the Tables folder with the corresponding Table/Figure name as they appear in the manuscript.

Inputs folder

Source: Malawi Fifth Integrated Household Survey 2019-2020

Folder: “Market Price/Input files and UV/Input files”

Files: IHS_Conversion_Factor_2020.dta, IHS5_VIIRS_monthly.csv, IHS5_VIIRS_monthly.dta, MOD_A.dta, MOD_B.dta, MOD_C.dta, MOD_D.dta,

Folder: “Market Price/Input files/Other inputs/IHS”

Files: calories.dta, HH_MOD_A_FILT.dta, HH_MOD_B.dta, HH_MOD_C.dta, HH_MOD_D.dta, HH_MOD_E.dta, HH_MOD_F.dta, HH_MOD_F1.dta, HH_MOD_G1.dta, HH_MOD_G2.dta, HH_MOD_G3.dta, HH_MOD_H.dta, HH_MOD_I1.dta, HH_MOD_I2.dta, HH_MOD_J.dta, HH_MOD_K1.dta, HH_MOD_K2.dta, HH_MOD_L.dta, HH_MOD_M.dta, HH_MOD_N1.dta, HH_MOD_N2.dta, HH_MOD_O.dta, HH_MOD_P.dta, HH_MOD_Q.dta, HH_MOD_R.dta, HH_MOD_S1.dta, HH_MOD_S2.dta, HH_MOD_T.dta, HH_MOD_U.dta, HH_MOD_V.dta, HH_MOD_W.dta, HH_MOD_X.dta, IHS_Conversion_Factor_2020.dta, IHS_Conversion_Factor_formerge.dta, IHS_Other_Conversion_Factor_formerge.dta, IHS_Other_Units_2020.dta, Non-food_CPI.xlsx, Non-food_CPI_IHS5.xlsx

Please note the comment on renaming data in our analysis is MOD_* versus mrk_mod_* in the publicly available data.

Folder: “UV/Input files”

Files: Same as above, and please note the comment on renaming data in our analysis is MOD_* versus mrk_mod_* in the publicly available data.
