January 18, 2024

This review verifies the reproducibility of the exhibits included in the paper “*Are the Poorest Catching Up?*”.

Contents in this review:

1. Main findings
2. List of exhibits and reproducibility status

Main findings

- Paper exhibits were attempted to be reproduced in a computer with the following specifications:
 - OS: Ubuntu 22.04.3 LTS
 - Processor: Intel(R) Core(TM) i5-1145G7 CPU @ 2.60GHz
 - Memory available: 15.7 GB
 - Software version: Stata version 18 MP
- The code was successfully executed on a new computer after:
 1. Changing the project path at line 19 in *o_Master.do*.
- The output demonstrates consistent stability across multiple runs. Specifically, executing the code two times consecutively yielded identical results
- The code takes approximately 5 minutes to run.
- Every exhibit has been reproduced accurately.
- The figures 13, 14, 16, and 17 were verified using intermediate datasets as the raw datasets were unavailable.

List of exhibits and reproducibility status
