This files will allow the replication of all the empirical content of the paper "Too young to die". Deprivation measures combining poverty and premature mortality.

All empirical content except Figure 4 is created via Stata. Open the "Code" folder for the Stata code as well as the Readme specific to the Stata code.

Figure 4 is created in Excel. Open the Figure 4 folder for Replication of this figure.

Content of folder:
- "Code": contains the Stata code for recreating all empirical results of the paper from the raw data
- "Data": contains the raw data. It also contains two empty folders: Temp and CleanedData. Temp is used to store temporary file when creating the data and CleanedData is the output folder for cleaned data storage
- Figure 4: contains the excel files allowing the replication of Figure 4
- Figures is an empty folder that will be used as an output folder for Figure creation when using the stata code.
