This review verifies the reproducibility of the exhibits included in the paper "*Unveiling the Impacts of Extremism in Refugee's Integration*".

Contents in this review:

1. Main findings
2. Reproducibility assessment
3. List of exhibits and reproducibility status

Main findings

- The code was successfully executed on a new computer after:
 1. Changing the working directory in the line 3 from the *RepMaterials.do*.
- The output demonstrates consistent stability across multiple runs. Specifically, executing the code two times consecutively yielded identical results
- Every exhibit has been reproduced accurately.
- We reviewed this package using private data, which is not published with the package. The published package contains only the code used to produce the exhibits. The authors are not authorized to share the data with external parties. Access to this data can only be granted upon a formal request and the explicit authorization of the World Bank Country Office. To request access to this data, please contact Sandra Roza at sandraroza@worldbank.org, who will provide guidance on the appropriate procedures for requesting and obtaining access to the data.

Reproducibility assessment

- Paper exhibits were attempted to be reproduced in a computer with the following specifications:
 - OS: Windows 11 Enterprise
 - Processor: Intel(R) Core(TM) i5-1145G7 CPU @ 2.60GHz
 - Memory available: 15.7 GB
 - Software version: Stata version 17

- We conducted our reproducibility analysis based on the paper shared by the authors by mail on October 31st. Our validation involved comparing the results generated by the code with the exhibits in the paper to assess their consistency.
